Dollar-Cost-Averaging (DCA) Fixed Account^{5,6}	<ul style="list-style-type: none"> • Used to periodically allocate purchase payments into the funds you've chosen for dollar-cost averaging. • Offers a more gradual approach to dollar-cost averaging. • Assets in DCA Fixed Account are credited with a fixed rate of interest. • Can only be elected at the time you make a purchase payment (minimum \$5,000). • Terms of six months or 12 months available. • Not available in New York. 	
Annuity Options⁷	Single Life <ul style="list-style-type: none"> • Life • Life with Cash Refund • Life with Period Certain • Period Certain Only 	Joint and Survivor Life <ul style="list-style-type: none"> • Joint and Survivor Life • Joint and Survivor Life with Period Certain • Joint and $\frac{2}{3}$ Survivor Life • Joint and $\frac{2}{3}$ Survivor Life with Period Certain • Period Certain Only

³ If you elect the Automatic Rebalancing Program, then the Separate Account Dollar-Cost-Averaging Program and the DCA Fixed Account are not available.

⁴ If you elect the Separate Account Dollar-Cost-Averaging Program, then the DCA Fixed Account and the Automatic Rebalancing Program are not available.

⁵ If you elect the DCA Fixed Account, then the Separate Account Dollar-Cost-Averaging Program and the Automatic Rebalancing Program are not available. The DCA Fixed Account is not available in New York.

⁶ Dollar-cost averaging does not assure a profit and does not protect you against loss in declining markets. Because dollar-cost averaging involves continuous investment in securities regardless of fluctuating price levels of such securities, you should consider your financial ability to continue the program through periods of fluctuating price levels.

⁷ For qualified contracts, upon the death of the owner (annuitant if the contract is held as a Custodial IRA), we may shorten the remaining payment period in order to ensure that payments do not continue beyond the 10 year post-death distribution period provided under IRC section 401(a)(9), or beyond the beneficiary's life or life expectancy for certain classes of beneficiaries, such as a spouse or an individual who is not more than 10 years younger than the decedent. In such a case, the adjusted payment stream will be calculated by first calculating the commuted value of the remaining payments, and then calculating an actuarially equivalent payment stream over the revised period, using the same rate used in the commutation calculation.
